INTRODUCTION

INTRODUCTION

The FlipBook component allow you to create a pageflip application within minutes. The generated pageflip application will impress your visitors.

code loaded INSTALLING

INSTALLING

Installing is very easy. Just install the component and drag and drop on stage.

GETTING STARTED

The FlipBook component is written for ease of use. To get started all you have to do is to drag and drop the component from the component panel on the stage.

Next, set the width and height of the pageflip application you want to generate. This is usually the page height and 2 times the page width. Save the movieclip.

Create pages from jpeg's or swf's and put them in a folder. Call this folder for instance "pages".

All you have to do now is go to the previous saved pageflip FLA and fill in the component parameters for the pages. All with the folder name in them.

Now press ctrl + enter and see the result.
